

ATO

PRONOUNCED "AUTO"

Your whole life, on Auto.

WHAT IT IS

ATO is a private, always-on personal AI. It runs the real domains of your life — family, finances, health, fabrication, and code — from a single beacon, with memory that never resets and autonomy you control. It lives on your own hardware. Nothing is sold, shared, or sent to the cloud.

THREE THINGS THAT MATTER

- **Private by design**

Runs on your hardware. Nothing sold, shared, or sent to the cloud.

- **Memory that never resets**

Continuity across every conversation and domain.

- **Autonomy you control**

It acts — only inside guardrails you can see.

ONE BEACON, EVERY DOMAIN

Forge · Smithy · Crucible · Family · Financial · Medical · Spark

Built for how your mind works — neurodiversity-first.
